CAN IT REALLY BE THAT EASY TO **CHANGE** COURSE MATERIALS?

AVERAGE TIMES FOR COURSE SET-UP

1:00 minute to request a cartridge

1:00 minute to create a new course from an existing OHM template course

4:00 minutes to set up Waymaker's automated messaging, which sends helpful nudges to students

5:00 minutes to import your ready-to-teach course into your LMS

10:00 minutes to compare learning outcomes and identify how to adjust content

30:00 minutes to review assignments, choose which to keep, and adjust point values

Change for the Better

Changing course materials means changing what happens in your classroom, and it opens possibilities to make teaching and learning different, better, and more affordable.

Change takes a little effort. But getting started with Lumen course materials is easier than you think.

1 Review the Content

Visit Lumen's course catalog to see our openly-licensed content for any course. Check out the learning objectives and depth of coverage, along with supplemental resources like PowerPoints, assignments, and more!

2 See the Courseware

Lumen delivers our digital content with interactive "courseware" tools designed to enhance teaching and learning. Follow the link below for a self-guided tour of our courseware products, Waymaker and OHM.

3 Try It Yourself

Request a course file. Within moments, you can import and try out Lumen course materials in your LMS (Blackboard, Canvas, D2L Brightspace, and Moodle).

Ready to Teach

Lumen courses are "ready to teach," meaning you can get started quickly with minimal set-up. You can do as much or as little customization as you like to fit your term length, learning objectives, modality, etc. Because Lumen courseware integrates seamlessly within your LMS, students and faculty find it easy to access and use.

IS IT POSSIBLE TO CONTINUOUSLY **IMPROVE** COURSE MATERIALS?

✓ **Identify poor-performing outcomes**

✓ **Evaluate content & assessments aligned with these outcomes**

✓ **Improve OER content**

✓ **Measure effectiveness again**

Make a Measurable Impact

Every Lumen course starts with a set of learning outcomes, and then we curate course content, develop assessments, and design learning activities to align with these learning outcomes. This process allows us to analyze how students are performing on each learning outcome and how well the course materials are supporting their learning.

- On the graph above, each dot represents a learning outcome.

- We map outcomes according to how well students perform and how they use content associated with each outcome.

- The lower right quadrant tells us where to make targeted updates because the content and/or assessment isn't doing its job at helping students learn.

We use this analysis to identify poor-performing outcomes. Then we work with instructional designers and faculty subject matter experts to evaluate how to improve the content and assessments to support effective learning. We develop and add these improvements to the course materials.
