

WHAT'S YOUR RECIPE FOR HIGHLY EFFECTIVE TEACHING?

Professional Development for Faculty

Many things go into outstanding teaching.

Lumen Circles help faculty members discover how to strengthen their teaching by applying evidence-based practices to support students' success.

Through virtual learning communities and a purpose-built platform, faculty enter a supportive space to learn, share, and hone their expertise in effective teaching strategies.

How do Lumen Circles work?

- 1. Set goals.** Identify how you want to develop your teaching practice.
- 2. Build skills.** Expand your teaching repertory, learn to work smarter, and deepen your understanding of effective practices.
- 3. Teach and reflect.** Apply what you're learning, consider how it's working for your students and where to improve.
- 4. Share via virtual learning circles.** Connect with peers, exchange feedback, and collect new ideas.
- 5. Recognize growth and progress.** Track progress towards goals as you incorporate new practices.

Support Teaching & Learning Innovation

For organizations working to transform teaching, Lumen Circles can report on the alignment between institutional objectives and faculty members' progress implementing effective teaching practices.

Lumen Circles: Communities of Learning

Lumen Circles build skills and confidence for faculty teaching in dynamic educational environments. They are suitable for any faculty member, discipline, and stage of career.

Offering different areas of focus and levels of depth, pick the Lumen Circles experience that works for you...
